Read the given passage and answer the questions that follow.

The cassowary is a large and colorful bird related to the emu, native to Northern Australia, New Guinea, and surrounding islands. It is considered the most dangerous bird in the world. Cassowaries are known to be shy and usually hard to spot, at least in their natural rainforest habitats. They are not overly aggressive, and attacks are rare. But they can do a lot of damage if they are provoked or angered.

The family Casuariidae includes three living cassowary species, all of the genus Casuarius. The largest cassowaries can stand as high as six feet and weigh up to 160 pounds. These large birds cannot fly, but their extremely powerful legs propel them at great speeds. Cassowaries have been clocked running as fast as 31 miles per hour through the rainforest.

Read the given passage and answer the questions that follow.

When children are in conflict with the law, they show a mirror to the roles teachers, parents and family members played in their upbringing. It is the teacher, after the parents, who shapes the formative years of a child and can become their guiding light to new, hitherto unexplored horizons. Teaching is not just another job with a pay check at the beginning or end of the month. It is a dedication to children and their cognitive growth.

Yet, administrators, especially in government primary schools, appear to have given only little thought to hiring teachers beyond their mandatory educational qualifications and basic training. Such an approach is neither practical nor child-centric. As for private schools, teachers are in a mad race to achieve the target of 100% pass percentage. For most of them, dealing with slow learners is an irritation, which has consequences. Not every university topper can make a good teacher. To teach, the person should not only know the subject but also have the knowledge and the skillset to make students active learners.
